

慈濟大學 103 學年度 研究所碩士班招生考試命題紙

科目：英文(醫資-甲組)

共1頁

請將以下的英文翻譯成中文(請先抄題目後再翻譯,每題20%)

1. The meter is the basic unit of length in the metric system. One meter is equal to 39.4 inches. Sometimes scientists must measure distances much longer than a meter. To do this, scientists use a unit called a kilometer.
2. Scientists use a wide variety of tools to explore the world around them. Tools may be as simple as paper and pencil or as complex as computer systems.
3. People have always dreamed of being able to walk on the moon. In 1969, this dream was realized when an American named Neil Armstrong became the first person to step onto the lunar surface.
4. Sharks have a very good sense of smell. They are also good at sensing splashing and other disturbances in the water. Sharks use these senses to hunt fish and birds that are already injured.
5. A subway system is a network of electric trains that, partially or totally, run underground for use in urban transportation.
